Position 5

I am running for a TIMUD board seat to ensure the Treasure Island community has a voice & a plan for a path forward. I am interested in securing our water supply and completing our beach restoration projects. In addition, I would like to improve communication with the Treasure Island community on projects in process.

I have 30+ years in retail management working with national brands including The Michaels Companies, Inc., Macy*s, and Bloomingdales. My strengths in leading & developing teams, creating and executing strategic initiatives and understanding consumer behavior give me the tool kit to work with the board on existing and future projects.

I was the President of MICHAELS Cares, a 501 (c) (3) foundation that helps Michaels team members in times of urgent need. The Michaels CARES board was responsible for fund raising and awarding cash grants. I led a team of nine board members, working cross-functionally to reach the 50,000 team members at Michaels. During my tenure, the team was able to double the annual grants awarded to \$800,000 through improved communication and streamlined operational practices.

My husband, Larry, and I own a home at 13135 Gulf Beach Drive. This was the first house built on Treasure Island and we feel a strong connection to the history & future of the community.
